Summary

Full-Stack (MERN & Next.js) Developer with strong proficiency in JavaScript/TypeScript, experienced in building scalable SaaS applications and responsive UIs using React/Next.js, Node.js, MongoDB, and Tailwind CSS. Actively practices Data Structures and Algorithms, demonstrating strong problem-solving and analytical skills.

Work Experience

Bluestock Fintech

Software Developer Intern

July 2025 – Aug 2025

Remote

- Built a fully responsive IPO web platform using React.js & Tailwind CSS, improving cross-device performance.
- Optimized frontend environment for faster development, builds, and deployment workflows.
- Developed modular, reusable UI components following clean code and scalable architecture principles.

Leafny Web Pack Services & Consultancy

Frontend Developer Intern

Sep 2025 – Nov 2025

Remote

- Developed core modules for a SaaS-based AI Interview Taker platform using MERN, Next.js, TypeScript, and Tailwind CSS.
- Built responsive UI screens including Landing Page, Candidate Dashboard, Login/Signup, and multi-step Onboarding.
- Implemented reusable components and optimized UI performance for smoother and consistent user experiences.

Projects

Language Exchange Platform | MERN, Stream SDK, WebRTC, Zustand, TanStack Query, JWT

GitHub

- Built a real-time MERN stack platform with 1-on-1/group video calls, chat, screen sharing, and call recording using Stream SDKs.
- Developed responsive React.js frontend with Tailwind CSS and DaisyUI, reducing UI development time by 60%.
- Implemented real-time messaging, reactions, and typing indicators; managed state with Zustand and TanStack Query.
- Secured routes using JWT Authentication and built scalable backend with Node.js, Express.js, and MongoDB.

Food Delivery App | MERN, Stripe API, React Router DOM, JWT

GitHub

- Developed a full-stack food ordering app with real-time order tracking and authentication.
- Built separate Admin Dashboard for managing 200+ food items, users, and orders.
- Integrated secure backend using Node.js, Express.js, and MongoDB.
- Created a Single Page Application (SPA) using React Router DOM, enabling seamless client-side routing.
- Integrated Stripe API for online payment and order checkout.

DeepSeek Clone | Next.js, Google Generative AI, Clerk, react-markdown, PrismJS, Svix

GitHub

- Implemented an AI-powered coding assistant using Next.js, React, and MongoDB, supporting multi-model LLM queries.
- Integrated Google Generative AI with Clerk authentication for secure, role-based access control.
- Enhanced code readability with markdown rendering and syntax highlighting via react-markdown and PrismJS.
- Managed Clerk webhooks using Svix and built scalable backend APIs with Express.js and Mongoose.

Technical Skills

- **Frontend:** React.js, Next.js, Tailwind CSS, DaisyUI, Zustand, Redux Toolkit, Lucide React
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication (JSON Web Token)
- **Database:** MongoDB
- **Languages:** JavaScript (ES6+), C, C++, HTML, CSS
- **Tools & Platforms:** Git, GitHub, VS Code, Render, Vercel
- **Libraries & APIs:** Axios, TanStack Query, Stream SDKs, WebSocket, Google Generative AI SDK, Stripe API

Education

Galgotias University

B.Tech - Computer Science and Engineering (AI-ML)

2021 – 2025

CGPA: 8.03
